- The navigation of the website is good.
- The infographics, plugins, themes used made the website interactive and lively.
- The focus area pages were good, especially having the different types of content under accordions, so users can expand and collapse the information.
- The infographics were a nice way to see how the data from the PDF can be translated into more interactive charts for the website
- We should have used a more consistent design in the regions section, similar to the focus area pages
